Ph: 7330950337

Professional Summary

Computer Science undergraduate specializing in Full-Stack Development, Backend Engineering, and AI-powered applications. Proficient in JavaScript, React, Node.js, Express.js, PostgreSQL, MongoDB and Supabase with hands-on experience building scalable web applications, secure REST APIs, authentication systems, and database-driven solutions. Strong interest in Agentic AI, workflow automation, and intelligent software systems, with practical experience developing AI-assisted platforms that integrate LLMs, automation tools, and modern backend architectures. Adept at rapidly learning new technologies, solving complex engineering problems, and delivering production-oriented solutions through structured development practices. Committed to building reliable, high-performance software that creates measurable real-world impact.

Projects

1. MediFlow—AI powered Pharmacy ERP

- Developed an AI-powered pharmacy ERP platform to automate inventory, procurement, and medicine lifecycle management.
- Built a full-stack application using React, Node.js, Express.js, and Supabase with a scalable REST API architecture.
- Implemented intelligent inventory tracking with low-stock alerts, expiry monitoring, and automated reorder workflows.
- Integrated AI agents and n8n automation to streamline operational tasks, notifications, and business workflows.
- Designed interactive dashboards providing real-time insights into inventory status, sales trends, and operational analytics.

2. PathWise

- Developed an AI-powered personalized career intelligence platform that transforms user skills, interests, and learning behavior into adaptive growth roadmaps.
- Designed intelligent recommendation systems capable of analyzing skill gaps, learning progress, and career preferences to generate dynamic educational pathways
- Built scalable backend workflows and personalized recommendation pipelines to support data-driven career guidance and learning optimization.
- Improved recommendation relevance and personalization accuracy to **94%** using adaptive recommendation logic and behavioral analysis models.
- Developed a modern end-to-end user experience integrating AI-driven recommendations, progress tracking, and personalized career insights.
- Demonstrated practical implementation of AI personalization systems for scalable learning and career development application.

Technical Skills

- **Languages:** Python, Java, C, JavaScript
- **AI/ML:** Machine Learning, Prompt Engineering, Large Language Models (LLMs),
- **LLMs & AI Platforms:** Gemini, OpenAI GPT
- **Web Development:** HTML, CSS, JavaScript, React.js, MongoDB, Postgresql, Node.js, Express.js
- **Core CS:** Data Structures & Algorithms (Fundamentals), OOPs
- **Tools & Platforms:** Git, VS Code, Microsoft Excel

Certifications

- **Python Essentials 1**— Completed Cisco Python Essentials 1, gaining a strong foundation in Python programming.

Achievements

Summer SaaS Hackathon—Secured track runner-up and recognized for developing an innovative SaaS-based solution through effective problem-solving, collaboration, and technical implementation.

Education

Bachelor of Technology in Computer Science & Engineering

Vardhaman College of Engineering, Hyderabad, India
2024-2028
